

modular system

Slastic is a modular soft seating system that creates linear and open combination as well as more private and reserved zones. While graphic in form and silhouette, the overall effect is elegant. In large spaces the linear form inscribes areas for waiting, resting and meeting. At home, it may be compact or commanding depending on what is required. Design Rafa Ortega.

Slastic's modules: straight module, inner and outer curve, armrest, magazine holder, create infinite forms and configurations. Matching table with four legs alu base and oval or round top.

M 381

Slastic is the perfect mix of elegance and modularity.
Injected foams for superior comfort and durability.

tailored elegance
